Energy Tips For Our Customers

GREEN Ideas

Does Your Spring Cleaning Include an Equipment Upgrade?

The spring season is a time for change and growth. It's when we watch the world around us shake away the cold grasp of winter and begin turning over new leaves. It also happens to be an ideal season to make energy-efficient upgrades to your home comfort system! Because spring bridges the heating and cooling seasons, it is the perfect time to make an upgrade to either system without having to sacrifice your comfort in uncomfortable temperatures.

Benefits of a System Upgrade Include:

- **Improved System Efficiency:** Outdated or broken heating and cooling equipment is highly inefficient. When you upgrade to a new energy-efficient system, it will help reduce your annual emissions by reducing wasted energy.
- **Lower Energy Bills:** Modern-day home comfort systems are more energy-efficient and environmentally friendly than ever before. They operate so smoothly and efficiently that they will require less fuel or power to provide exceptional comfort, which you will see in lower fuel usage and energy bills.
- **Increased Home Comfort:** Say goodbye to noisy, mediocre home comfort from inefficient heating equipment. With whisper-silent technology, you won't even hear your new system as you enjoy comfortable, even temperatures across your whole home.

Another great reason to upgrade your heating or cooling equipment now is because of the available tax rebates! In addition to saving money every month in energy costs, you can save money for upgrading through the Upgrade & Save NYC & LI Rebate Program!

Upgrade & Save NYC & LI Rebates:

- **\$300** – For the replacement of an existing oil-fired boiler or furnace
- **\$200** – For the installation of a new aboveground oil storage tank
- **\$600*** – Federal tax credit on qualifying energy-efficient equipment

**Not part of the Upgrade & Save Program*

With increased comfort, savings, and lower energy bills, make sure you add a heating or cooling upgrade to your spring-cleaning list.

Your Fuel, Your Choice

Your heating equipment thanks you for using Bioheat® fuel!

Bioheat® fuel acts as a natural lubricant inside your heating system and allows it to run more efficiently while helping extend its overall lifespan. In addition to providing you with low-carbon and reliable comfort, Bioheat® fuel helps protect the vital components inside your heating equipment!

IT'S TAX SEASON AND BIOHEAT® FUEL CAN HELP

The New York State Clean Heating Fuels tax credit can lower your obligation to the state!

When you file for IT-241 (or CT-241 for businesses), you earn a credit of one cent per gallon for every percentage of biodiesel in the Bioheat® fuel you use, from B6 (6%) to B20 (20%). That's six cents per gallon for B6 blends of Bioheat® fuel and 20 cents per gallon for B20. Please contact our office for your Bioheat® fuel delivery records and review your eligibility with your tax consultant.

Other Benefits of Using Bioheat® Fuel Include:

- Improving the lifespan of your heating equipment
- Increasing the fuel efficiency of your system
- Reducing your home's carbon emissions
- Contributing to a thriving American economy that employs over 62,000 people

BY USING BIOHEAT® FUEL TODAY, WE ARE HELPING CONTRIBUTE TO A BETTER TOMORROW!

EVERY DAY IS EARTH DAY FOR BIOHEAT® FUEL CUSTOMERS!

In the last few years, Earth Day has taken on a greater meaning due to the effects of climate change. But our customers don't have to wait until April to celebrate Earth Day because Bioheat® fuel is helping you save the planet every single day!

And now, the entire state of New York can celebrate, because as of July 1, 2023, all fuel dealers in the state have begun delivering Bioheat® fuel to their customers!

Bioheat® fuel is aiding in the fight against climate change by:

Reducing Carbon Emissions – Bioheat® fuel is a blend of ultra-low sulfur heating oil and organic materials like soybean and vegetable oils. Replacing traditional heating oil with B100 (100% biodiesel) can provide reductions in carbon of up to 90%.

Improving Our Community Health – Recent studies have shown that communities that switch to B100 for home heating and transportation would prevent 340 premature deaths a year and reduce cancer risks by 45%.

Fueling our Agricultural Industry – The renewable properties used to create Bioheat® fuel are helping fuel our farming industry. Soybean oil has become a major component in the creation of Bioheat® fuel, as well as canola, corn, and other plant oils. Plus, the renewable biodiesel in your Bioheat® fuel reduces overall lifecycle greenhouse gas emissions by up to 72%.

Earth Day is on Monday, April 22, and we implore you to celebrate by discussing the benefits of Bioheat® fuel with friends and family. Because what we can do today will better our world for tomorrow, and Bioheat® fuel is a clear path forward!

Budget Plan Enrollment is Coming!

Now that we are nearing the end of winter, it's the perfect time to begin preparing for next winter! Enrolling in a budget plan will spread out your winter fuel payments across the whole year, so you have the same low-monthly payment every month.

We will be opening enrollment for next year's budget plan in the coming months, so make sure you keep an eye out so you can enjoy the following benefits:

✓ Lower Monthly Fuel

Payments: You spend the majority of your money heating your home during only 4 months of the year. A budget plan will calculate how much you would spend on Bioheat® fuel during those months and divide it across the year.

✓ Easier Year-Round

Budgeting: You won't have to guess from month to month how much you will have to spend on fuel deliveries. You can expect the same low-cost payment every month, which you can easily factor into your other expenses.

✓ **Peace of Mind:** We all know that feeling around the holiday season when our wallet starts to feel a little lighter. Enrolling in a budget plan gives you the peace of mind of knowing exactly how much you will be paying to heat your home.

Enrolling in a budget plan is quick, easy, and a great way to prepare yourself and budget for the winter season next year!
